Restoring Internet Explorer 7 in CybraryN™ software

Issue

When Internet Explorer version 7 is launched from the CybraryN™ menu, IE7 minimizes to the taskbar and cannot be restored.

Solution

1. Run CybraryN™ software.
2. Click on **File | Configure Applications | Menu Builder**
3. Find the menu that contains the Internet Explorer shortcut by clicking **Menu Up** or **Menu Down**.
4. Click on the Internet Explorer shortcut once, and then click **Properties**.
5. Change the **Program Type** to **COMMAND32**.
6. Click **OK** twice to return to the main CybraryN™ menu.
7. Click **File | Exit** and save your changes.

The next time you run the software, the problem should be fixed.
